USAGE OF JDR_UTILS API

1. List all OA framework documents (personalizations, extensions, documents. etc) in a path (partial or full path).

DECLARE

BEGIN

jdr_utils.listdocuments('/oracle/apps/ap/oie',TRUE);

END;

2. List all Personalizations, extentions etc at various levels for a specific object.

DECLARE

BEGIN

jdr_utils.listcustomizations(p_document => '/oracle/apps/ap/oie/test/webui/HomePG');

END;

3. List all personlization and extention details in XML format.

DECLARE

BEGIN

jdr_utils.printdocument(p_document =>

'/oracle/apps/ap/oie/test/webui/customizations/site/0/HomePG');

END;

4. Delete document, personlization, extentions. You need the full path.

DECLARE

BEGIN

jdr_utils.deletedocument(p_document =>

'/oracle/apps/per/irc/candidateSelfService/server/customizations/site/0/VisitorAM');

END;
